

The Logo

The Norco College logo was developed by a team of Norco College personnel. It depicts the focus on emerging technology and the innovation found here as exemplified by supportive staff in an accessible environment. It is made up of two components: the hand-lettered name Norco which doubles as the College symbol and the word College which is the endorsement of the District and our accrediting body. The components are always placed together in this manner and should never be altered in any way or reproduced in any other way unless prior approval is gained by college administration. The proportions and colors should never be altered. This is the primary college logo and should always be the **first choice** in any publication.
