

FALL 2015 STUDENT SERVICES PROGRAM REVIEW

Introduction

The following is an explanation of the methodology by which the student services program review data were gathered. The files used for these data are referential files furnished through the California Community College Chancellor's Office (CCCCO). This report is organized by program, with three outcome areas reported for each program (demographics, success, and persistence). The the number of students in each program was provided by the program and/or service units.

DEMOGRAPHICS

Students were disaggregated by age, gender, and ethnicity by using the ST referential file. To disaggregate age, the STD1 data element was used; to disaggregate gender, SB04 was used; and for ethnicity, STD10 was used to produce the results on the 'Demos Norco SS' tab. Several of the age categories in STD1 were collapsed to produce the four categories as indicated under "Age". For gender, the "Unknown/Unreported" category was not reported since it is such a small percentage of the general population (0.5%). Except for Asian, Ethnicity was reported as categories indicated in STD10. Asian includes both Asian and Pacific Islanders. The Other category for ethnicity includes two or more races or unknown responses.

SUCCESS

Success is reported on the basis of enrollments and was derived from the SX referential file. Success is defined as the ratio (percentage) of the following numerator and denominator:

- Numerator: A, B, C, P grade
- Denominator: A, B, C, D, F, P, NP, W, I (incomplete), DR (drop after census but before drop date), FW.

All success outcomes are then disaggregated by SB15 (enrollment status) to produce the subcategories of First-Time Students, Continuing Students, and Not Applicable/Uncollected. The following are definitions for each of these student categories:

- First-Time Student: first-time student (first time in college after HS), first-time transfer (first time at Norco after enrolling in another college), Returning Student (first time re-enrolling after absence from Norco)
- Continuing Student: enrolled in present session and was enrolled in previous regular semester.
- Not Applicable: special admit currently enrolled in K-12.
- Uncollected/Unreported-No response due to refusal, oversight, or enrollment in only noncredit courses.

PERSISTENCE

Persistence is defined as any student who persists beyond census (and receives a valid notation) in one or more Norco College courses in the first semester and does the same in the subsequent semester anywhere in the district. Students who have received any degree or certificate (including those less than 18 units) since during the last two academic years are removed since they are completers. All persistence outcomes are then disaggregated by SB15 (enrollment status) to produce the subcategories of First-Time Students, Continuing Students, and Not Applicable/Uncollected. The following are definitions for each of these student categories:

- First-Time Student: first-time student (first time in college after HS), first-time transfer (first time at Norco after enrolling in another college), Returning Student (first time re-enrolling after absence from Norco)
- Continuing Student: enrolled in present session and was enrolled in previous regular semester.
- Not Applicable: special admit currently enrolled in K-12.
- Uncollected/Unreported-No response due to refusal, oversight, or enrollment in only noncredit courses.

FALL 2015 STUDENT SERVICES PROGRAM REVIEW

Introduction

STUDENT SUCCESS FACTORS

As of Fall 2014, this report includes a breakdown of the number and percentage of students in each program who received a comprehensive educational plan.

A comprehensive education plan was derived from the SS referential file (SS09) and the SM referential file (SM12). If for SS09 a student had either a comprehensive ed plan (SS09=3), or a comprehensive and abbreviated ed plan (SS09=2), or a student received assistance during the development of a plan (SM12=P) anytime in the last 3 years, then students were identified as having a comprehensive education plan in the selected term.

Cumulative GPA was calculated using the SX referential file. Grade points were calculated by multiplying SXD3 (attempted units) and SX04 (grades), and dividing those grade points by total units attempted. GPA was computed for each of the student groups by enrollment status, in addition to an average for each group.

Full-time status was calculated using the SX referential file, SXD3. Students enrolled between 1-11.9 units were considered as enrolling in less than 12 units. Students enrolled in 12 or more units were considered as enrolling in 12+ units. Full-time status was then calculated for each of the student groups.

ENROLLMENT AND STUDENT COUNTS

"Enrollments" refers to a duplicated count of enrollments at Norco College. "Number of Students" refers to actual number of students calculated from an unduplicated student enrollment file. In cases where student status is unknown, may be unavailable or not self-reported by the student.

A total number of students is provided for each student group. The number of "submitted" students refers to the number of student IDs provided by student program leaders. The number of "Missing" students may represent students who may have utilized a service but did not stay enrolled past census, missing, or inaccurate student IDs. Thus, the "Total" number of students reflects those who enrolled past census for the term and were submitted by student program leaders as belonging to a particular group.

Organization of the Report

The following student service outcomes are reported for Norco College and each of the student groups identified below.

Demographics

Age*
