## Orientaion

All first-time college students must complete a freshman online orientation as a part of the matriculation process prior to registering for courses. The orientation introduces students to services and educational programs at Norco College; provides students with information on registration procedures; and prepares students for the assessment placement exam, which is the step following the orientation. Students will be able access the online orientation approximately two business days after submitting their Norco College application.

To access the online orientation, please log on to your [WebAdvisor](#) account and click on the online orientation link under the academic planning header. Make sure to schedule your appointment for the placement exam at the Assessment Center approximately two business days after completing the orientation.
