## SAFETY & LOSS CONTROL

We are a leading provider in the California insurance market for educational public entities. As one of the first and largest school JPAs, we are a full service not-for-profit risk insurance pool and specialize in providing insurance coverage, risk-financing options, cost containment

programs and loss control services to public school districts and community colleges throughout California.

## CLAIMS SERVICES

We provide oversight of the entire claims process from cradle to grave. We have a dedicated staff committed to the mitigation of claims once they have occurred. We believe that our members should have an active voice in their representation and, therefore, attorney selection is done in coordination with the member. There is no additional charge for claims administration.
