Hello fellow Norco College Students,

My Name is Samia Irfan, and I am running to become your next Vice President of Administration. I am finishing up my first year at Norco College and I am majoring in Biomedical Engineering. I am a first-generation college student focusing on doing everything in my power to help others. My goal is to one day become a Pediatric Surgical Oncologist at St. Jude Children's Research Hospital. Until then, I will continue to do everything I can to help others starting with becoming your Vice President of Administration. Off-Campus, I spend my time mentoring children ages 2-18. On-Campus, I am currently your Senator of Administration, the Vice President of Active Minds Club, and a member of the Prosthetics Project. All these activities have made me more than prepared for what being Vice President of Administration entails. From a young age, I developed a passion to help others, as it is the only thing that constantly brings me joy and happiness. As I was growing up, I was very outspoken, but my voice was not being heard and I did not have someone to represent me the way I will continue to represent you all.
