

Anonymous Course Evaluation

Directions: I'd like to get your honest response to several questions about your experience in the course this semester. Please do not put your name on this document—I want to make sure you're comfortable writing openly. I will wait until after final grades have been submitted to read your responses to these questions, which I hope will give me ideas about how to improve the course (and my teaching of it) the next time.

1. What did you learn in the course this semester? What skills or areas of knowledge did it teach you or help you improve upon?
2. Did you learn everything you expected to when you began the course? What, if anything, didn't you learn that you wanted or expected to?
3. What aspects of the course, and my teaching of it, helped you best to learn? What, in other words, would you recommend that I do in the same way the next time I teach the course?
