H. New Program:

1. ELE- CERT Biomedical Electronic Equipment Repair \*N The healthcare industry is increasingly reliant on advanced medical technology, creating a strong demand for biomedical equipment technicians (BMETs) who can repair, maintain, and calibrate medical devices. According to the U.S. Bureau of Labor Statistics (BLS), employment for medical equipment repairers is projected to grow by 6% from 2022 to 2032, faster than the average for all occupations. The rise of telemedicine, wearable health devices, and AI-driven diagnostics further amplifies the need for skilled biomedical electronics technicians. A Biomedical Electronic Equipment Repair Program at Norco College would address industry demand, offer high-paying career opportunities, and expand the college's technical education offerings. The program would benefit students, the local healthcare industry, and the broader community by filling a critical workforce gap while supporting Norco College's mission of providing career-focused, hands-on education.

## Statement of Purpose

The curriculum committee, a sub-committee of the academic senate, has two primary purposes: to review and approve new curriculum including new courses, course modifications, new programs and program modifications, and to review and approve the curriculum approval process. The college curriculum committee is the sole approving body for Norco College only curriculum. For district shared curriculum it has one vote in the district curriculum committee. The curriculum committee is also responsible for keeping abreast with state mandated curriculum changes and reporting those changes to faculty. Committee members report on curriculum at their department meetings and solicit suggestions and recommendations when needed.
