LIFE IN A TRASH BAG

#Rewriting the Script

A trash bag is what roughly 438,000 children in the foster care system consider their suitcase when arriving in their new foster home. Out of those 438,000, 28,000 age out of the system and only 11% of those that age out become college freshmen and continue to pursue higher education.

#OurCommunityIsNotOurZipCode

Our Phoenix Scholars Program are part of that 11%. To honor their triumph over adversity, every student will be dedicated their own palm tree on campus to showcase their resilience through their journey, via QR codes.
