Sources: CDPH, WHO, CDC, Local County Data

The date for which case statistics and hospital data were reported. Hospital COVID data are self-reported through a portal managed by the California Hospital Association and pulled at 2pm. COVID case statistics are reported by local health departments to CalREDIE and are pulled at 2pm. Hospital data and case statistics are integrated by the California Department of Technology and made available through the Open Data Portal the following morning. CA Open Data Portal is at least 24 Hours behind although a backlog of new case reports at the State level has ostensibly been cleared, some County dashboards still contain notes that indicate data are missing. *California Demographics from State Database Blueprint Data Chart 12-15-20 & census.gov . Presumptive active cases - A calculation (Total Cases - Recovered - Dead) (* LA and Mono County does not report recovery rates)

Japan plans mass vaccination as Olympic doubts mount

- Tokyo 2020's opening ceremony is in six months, but a surge in COVID-19 infections in Japan and worldwide has cast fresh doubt over the event.
- Japan aims to start vaccinating the general public against the coronavirus in May, just two months before the delayed Olympics are due to start, as more doubts emerge over whether the event will even take place this year.
- Public support for the Olympics has plummeted, with more than 80 percent of people recently polled in Japan saying they should be cancelled or postponed again.

Biden to sign day one executive order to shift coronavirus-fighting strategy

- President-elect Joe Biden plans to take his first steps Wednesday to demonstrate a new strategy to fight the [coronavirus](#), signing executive orders to require masks on federal property, renew emphasis on biodefense and reengage with other nations trying to conquer the global health crisis.

https://www.washingtonpost.com/health/biden-covid-executive-actions/2021/01/19/bf695e50-5a9a-11eb-b8bd-ee36b1cd18bf_story.html

Doubling Up Masks Creates 'Obstacle Course' For COVID, Colorado Doctor Encourages You To Consider It

- Health experts saying wearing a mask provides protection against COVID-19 both for the person wearing the mask and those around them. Now we're hearing wearing two masks may offer even more protection.
- "Specifically what we're saying is that two masks may actually equal the protection you would get from N-95 masks, which is considered the best mask there is short of a complete respirator-type unit," Hnida said.
- "If we have people and give them an outlet for entertainment in the restaurant space, in the bar space, we have much more of an opportunity, in my view, to be able to regulate and control that environment," [Lightfoot said](#). "People are engaging in risky behavior that is not only putting themselves at risk, but putting their families, their co-workers and other ones at risk. Let's bring it out of the shadows."

Did shutting down outdoor dining contribute to California's COVID-19 surge?

- Late last week, Chicago mayor Lori Lightfoot — typically cautious on COVID-19 policy — raised some eyebrows after calling for restaurants and bars to reopen "as soon as possible."
- Her logic: The current COVID-19 surge has been primarily fueled by at-home gatherings and parties, and if people are going to gather regardless of what any stay-at-home order dictates, state and local governments should try to provide spaces where at least some mitigation efforts will be taken.
